Selenium Java Training - Session 3 - Java (Part 1) - Getting Started with Java

Java (Part 1) - Getting Started with Java

What is Java?

- Java is a programming language

What is the Role of Java in Selenium?

- Java plays a major role and Selenium is nothing without Java.

What amount of Java is enough for Selenium?

- Java at a high level can be divided as:
  - Core Java
  - Advanced Java
- Only Core Java is required for Selenium

Java Installation and Configuration

- We cannot execute our Java programs without installing Java
- Download Java 11 JDK and Install it
- Configure Java (Advanced System Settings) and confirm

Eclipse IDE Installation and Launching

- What is Eclipse IDE?
- Download Eclipse IDE for **Enterprise** Java Developers and Install
- Show how to select a different location for Workspace.
- Pin the Application file to the Task Bar

Creating a Java Project and Executing a Sample Program

- Create the Java Program and Execute a Sample Program
- Also, show the workspace changes
